OUR FACILITIES ENABLE US TO SERVE YOU EFFICIENTLY

BIRD'S EYE VIEW OF OUR HATCHERY

The six greenhouses in this picture are one hundred feet long and cover a surface exceeding 15,000 square feet. We carry on hand many thousands of tropical fish and large collections of water plants, which enables us to make prompt shipments whenever weather conditions permit.

Our Aquarium Factory is located in the rear of these buildings. With large storage facilities we have a constant stock of all aquariums on hand, permitting us to give you prompt service. Our aim is always to furnish you with the better quality merchandise at lowest prices.

OUR SHIPPING DEPARTMENT, EXHIBITION BUILDINGS AND MAIN OFFICE
2141 CRESCENT AVENUE

Our Location Is 6200 West and 2100 North. Phone, EVERgreen 7265

Here we have created efficient shipping facilities for the proper handling and packing of orders. The packing of merchandise is very important.

Poor packing and excessive weight creates breakage and waste which has to be added on to the retail price.

Minimum Quantity: If you order less than 10 fish of one kind add 5c per fish. Except when value of one fish is over \$1.00.

Cash with order, unless satisfactory credit can be established.

Shipments of Live Stock: We guarantee safe arrival of live stock within the Fifth Zone of St. Louis. We reserve the right to refuse replacements should the loss be the fault of the carrier. In case of loss we do not entertain claims without bad order report or exception report, which can be obtained at the time of delivery and which must be mailed to us. We do not entertain claims for loss of live fish unless loss exceeds 5%. We positively can not guarantee the live delivery of tropical fish from November 1st until March 1st and we wish to call your attention to our further guarantee concerning shipments during the winter.

Winter Shipments of Tropical Fish: In order to make shipments as safe as possible it is necessary that we have your co-operation on your end. You agree to get the fish from the depot when they arrive—we will let you know when they are due to arrive. We find that we have to make a special trip for each shipment and see that it gets on a heated express car. It takes time and is costly and we therefore will supply this extra service free of charge and guarantee live delivery of orders amounting to \$25.00 or more for fish. On smaller orders, if you wish live delivery guaranteed during winter, we will charge a special handling fee of \$3.00. If this fee is not included or mentioned in the order we assume you want the fish shipped at your risk. And we will ship in special insulated cans same as other shipments and do our best to have shipment arrive in good shape. However, we will not assume responsibility for loss. We do not refund for loss of fish but will only issue credit to the value of loss.

Shipping Can Deposits: Some of the special cans cost us as high as \$7.50 each. All empty cans must be returned prepaid. We reserve the right to ship C. O. D. for deposit of containers to customers not well known to us. This deposit is refunded upon receipt of empty container. We make a rental charge on thermos and other special containers of 50c per week, if held more than three days after receipt of shipment.

Parcel Post Shipments: Are made at purchaser's risk.

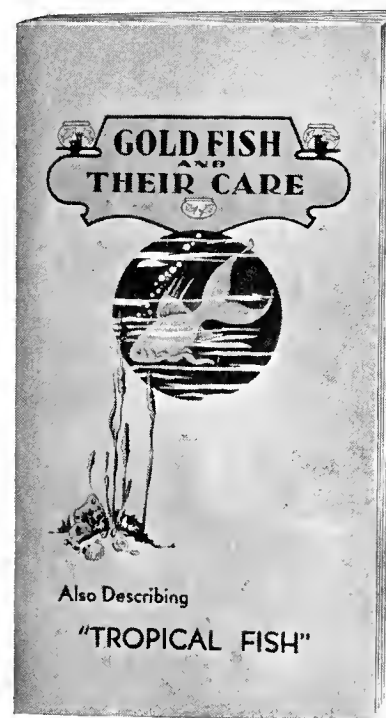

Shipping Cans: During winter months tropical fish are shipped in thermos cans. Every order includes the agreement to return these containers promptly prepaid. During the summer months fish are shipped in light tin cans. Please remit 30c each for these cans, figuring 25 medium size fish per can or 50 small fish.

Breakage: Our method of packing practically eliminates all breakage. However some breakage can not be avoided if boxes are handled rough. Secure bad order report when breakage occurs and mail this to us or file claim with carriers to cover damage.

Packing: All shipments are packed to insure the utmost safety. We use strong corrugated boxes whenever possible to reduce excessive weight. No special charges are made for packing boxes.

Prices: Price quotations in this catalog are wholesale quotations and strictly net. Terms 1% 10 days, net 30 days.

Claims: No claims allowed unless made within three days after receipt of shipment. We do not consider claims unless inspection is made at the time of delivery and if tropical fish are shipped the temperature is taken and recorded on bad order report.

This 24-page booklet contains 20 illustrations and a beautiful two-color cover.

It describes all popular aquariums, plants and fish, diseases and treatments, etc.

Many questions are answered in this book. The average dealer would save money by giving these books away instead of trying to explain and answer all of the various questions which accompany, at times, small sales and consume valuable time.

Show the beginner this book. Save time and have a more satisfied customer.

AQUARIUM DEPARTMENTS AND YOUR STORE

If you have neglected your aquarium department you have failed to consider the popularity of Tropical Fish and the supply line which is also a very profitable item in this department. Perhaps you have on hand a lot of shelf worn merchandise which you bought cheap and you blame the depression, rather than yourself because it does not move. We admit that our goods are not the cheapest, but we insist upon comparison of quality and service. Nobody has more power to prevent price cutting than the retailer. Reduced prices are not important nor helpful, perhaps otherwise. Sane people recognize the wisdom of weighing quality and quality, not price, restores confidence in your customer. There is an upward trend in quality buying. Our 1934 sales show that people are turning their attention to quality merchandise. The fancier and higher priced aquariums are in good demand, new varieties of fish and plants at higher prices are in demand which shows that the public are indulging in luxuries and will pay for better material.

Have You a Tropical Fish Department?

Your initial steps greatly determine the extent of your success with this department. Each year we are called upon to equip many new departments. Consult us if you intend to put in new stock tanks. Some time ago we received an order from a dealer who advised us that each year he sells all of his stock tanks at cost and orders a new supply of tanks and so keeps his aquarium department always in tip top condition, the attractive display of merchandise increases sales.

Our Policy

Our aim is always to supply the utmost in quality. Our reputation as pioneers in the tropical fish industry has never been questioned. We have consistently adhered to the policy that we can serve you best by supplying quality at the lowest possible price.

Aquarium Accessories and Supplies

The smart dealer recognizes the fact that accessories are the backbone of the department. The supply sales should constitute at least 50% of the total sales. If your sales show a smaller volume consult us. We are only too glad to acquaint you with sales possibilities to overcome this deficiency.

Why You Should Choose Beldt Products

We have always maintained high standards of quality combined with efficient service. When you buy the cheapest merchandise you are making the least profit because you have to sell it cheap and you invite cheap trade. This applies to practically everything you sell. The quality that helped us over the rough roads the past few years is the same quality that will keep your customers. Our merchandise is not sold in Chain Stores at cut rate prices. When you send us an order, you are not spending money. We consider that you are making an investment with the sole purpose of increasing your income. And with this fact in mind we intend to serve you and try to deserve your future business.

AN INVITATION

We greatly appreciate hearing from you and your letters will always receive due consideration. If you want to say thanks or if you have a kick coming, tell us—it's our business, and don't fail to stop in when in St. Louis.
